

Improve accuracy without compromising on speed

in the fast paced warehousing environment

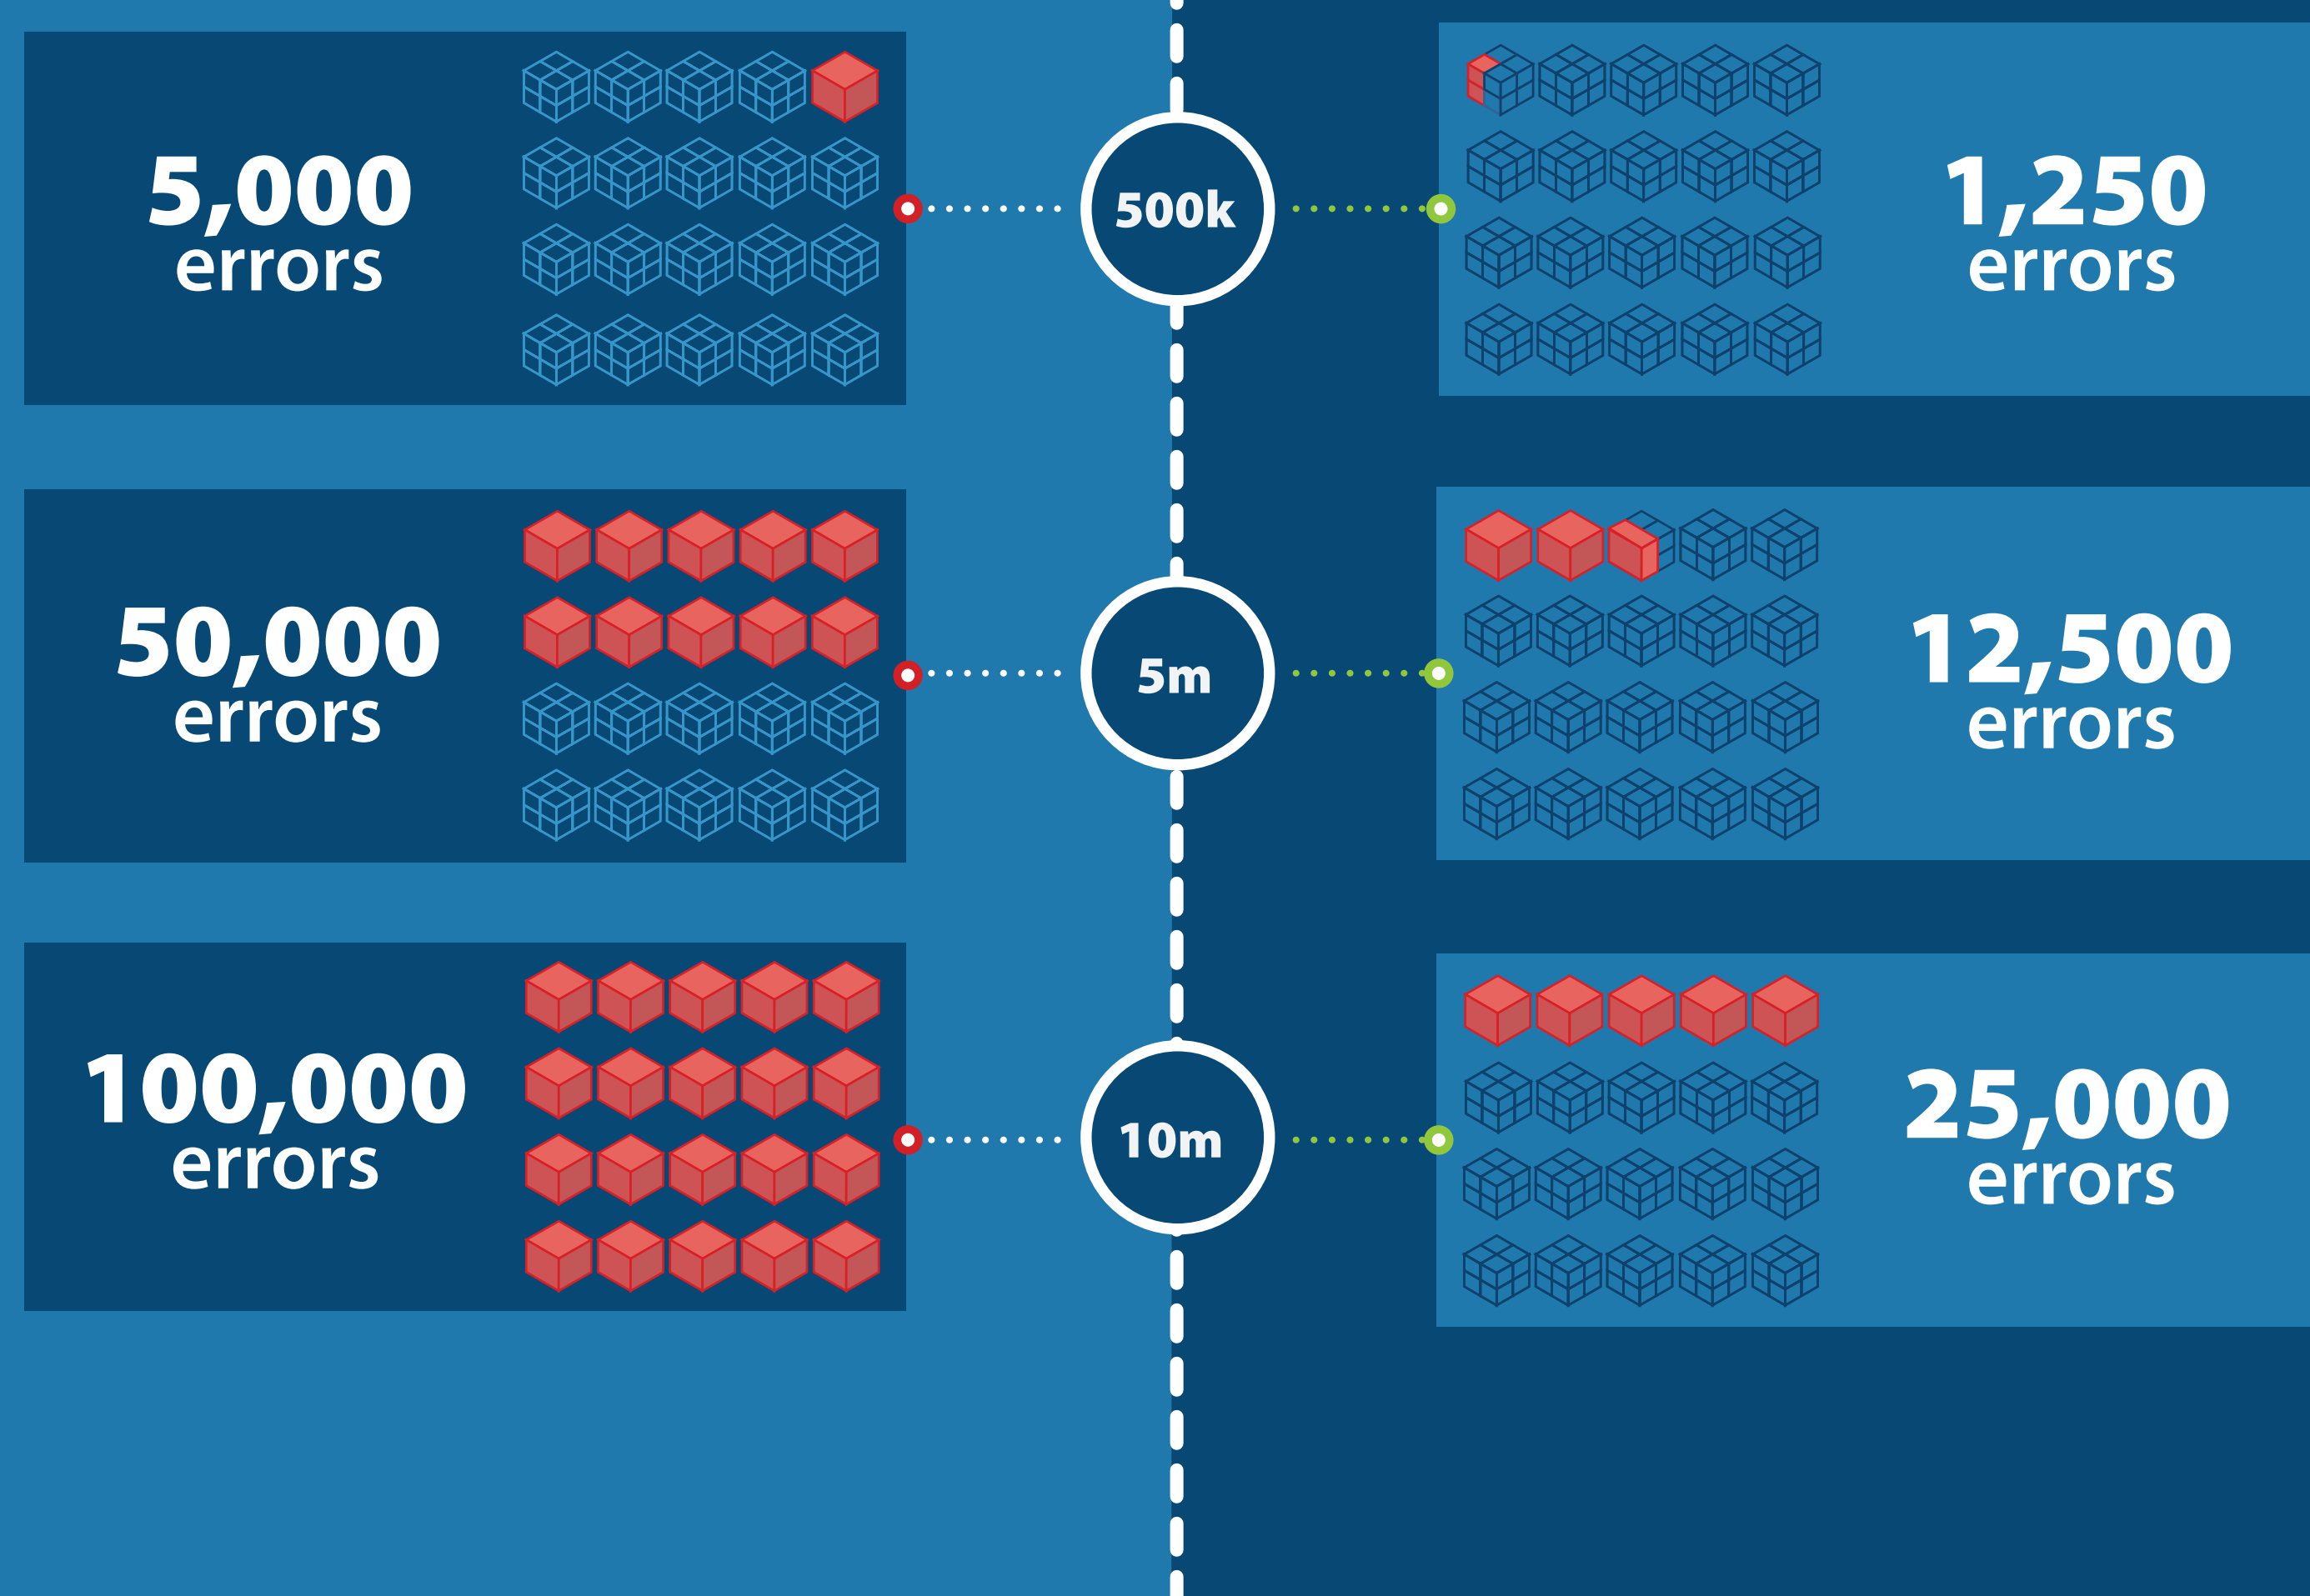

What is a mobile picking solution?

The mobile picking solution is designed so you **no longer have to compromise accuracy over speed** in the fast paced warehousing environment. By **moving quality control to the point of pick**, the solution allows the picker to verify the accuracy without slowing down the picking process.

Small changes in accuracy generate large savings

Lines picked per annum

Assuming an average cost to fix each error was £50
To include re-picking, re-stocking, inventory adjustments and admin

	500k	5m	10m
Current Picking Process	£250,000	£2,500,000	£5,000,000
Mobile Picking Process	£62,500	£625,000	£1,250,000
Annual Saving	£187,500	£1,875,000	£3,750,000
