

## T-RUBBER MOLDING

Truck Scale  
Accessories

*Technical Specification*

### DESCRIPTION

At each end of a weighbridge, there is a clearance gap between the scale and the foundation. This opening allows the entry and accumulation of dirt, debris, product, snow, and water which can lead to premature wear, corrosion, and even weighing errors.

Avery Weigh-Tronix T-Rubber Molding will reduce the amount of unwanted material that enters the gap at the ends of the scale, thereby reducing the amount of maintenance that is required and the risk of weighing errors caused by accumulation.

### SPECIFICATIONS

#### Features

Designed specifically for use in outdoor and indoor truck scale applications

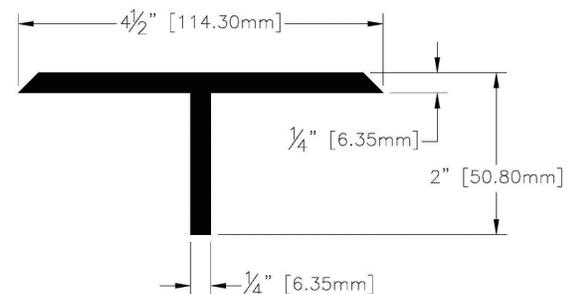

- Made from high quality, premium EPDM rubber for best wear and long life
- ▶ Highly resistant to impact, tears, chemicals and outdoor weather conditions
- ▶ Hardness value of 70 durometer (ShoreA)

Durable web thickness of 0.25" (6.4 mm)

4.50" (114.3 mm) wide x 2" (50.8 mm) deep

Available in the following lengths:

- ▶ 10'L (3.05 m)
- ▶ 11'L (3.35 m)
- ▶ 12'L (3.65 m)
